**DETAILED ACTION**

***Response to Amendment***

1. The amendment filed on 06/16/2006 is accepted and entered.

***Allowable Subject Matter***

2. Claims 1-13 allowed.
3. The following is an examiner's statement of reasons for allowance:

Regarding claims 1-13, the cited prior art of record does not disclose of fairly suggest a storage phosphor system comprising, along with the other claimed features, a resonant microcavity converter for converting emitted radiation from said storage phosphor to radiation at a longer wavelength than said emitted radiation but with an angular intensity distribution that is substantially narrower than a Lambertian distribution.

The balance of claims are allowed as being dependent upon an already allowable claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Response to Arguments***

4. Applicant's arguments, see pages 5-7, filed 06/16/2006, with respect to claims 1-13 have been fully considered and are persuasive. The rejection of claims 1-13 has been withdrawn.

Art Unit: 2884

The Applicant's arguments regarding claim 1 have been deemed persuasive. The use of a resonant microcavity converter in conjunction with a storage phosphor system to decrease the angular intensity distribution of emitted radiation has not been disclosed or been fairly suggested by the cited prior art of reference.
